

Interior Designer Bio

“The best design comes from listening and collaborating with your clients. Your home and design should reflect your personality, not the personality of the designer.”

Whether you are building a new home, creating unique interiors in existing spaces or reinventing your space, G will bring your vision to life. Past projects have included the PGA Village and luxury homes in Lake Forest, Florida.

In new spaces, G will address furniture layouts and lifestyles at the beginning of your house design project. G can also create new looks, within an existing space, that will enhance everything you own.

With over 10 years experience in the business, G will integrate fabric, window treatments, bedding treatments and upholstery options. G will also assist you with paint selections and accessorizing. His outlook will pull together the entire picture and therefore, maximize your investment.

Whether you are starting from scratch or have lived in your space for 30 years, G will produce the inspiring environment you have always wanted.

G’s association with Rafaela’s Custom Décor brings together a first in class, dedicated resource that has produced the finest results.

“I look forward to working with you and making your home the appointed, nourishing environment you intended it to be.”
